

SUBASH DAHAL

Software Engineering Student | Data Analytics | AI/ML

Pokhara, Nepal • +977 9866311339 • dahalsubaash12345@gmail.com • subashdahal17.com.np

PROFESSIONAL SUMMARY

Motivated Software Engineering student with internship experience in mobile application development, data visualization, and data-related systems. Hands-on experience with Flutter, Dart, Python, SQL, machine learning, NLP, Power BI, and database technologies. Proven track record in building end-to-end projects combining data analytics, AI/ML, backend development, and visual dashboards, with a deep focus on Data Analytics, Data Engineering, and Machine Learning.

TECHNICAL SKILLS

Languages:	Python, SQL, PHP, Dart, JavaScript, HTML, CSS
AI / Machine Learning:	Machine Learning, NLP, TF-IDF, Random Forest, BERT, scikit-learn, pandas, NumPy
Data & Analytics:	Power BI, Excel, Data Analytics, Data Warehousing, Data Visualization
Mobile & Backend:	Flutter, Dart, PHP, MySQL, Flask, DBMS, REST API / CRUD
Tools & Concepts:	GitHub, Figma, Canva, Responsive Design, Backend Architecture, Data Pipelines

INTERNSHIP EXPERIENCE

Software / Mobile Application Intern	May 2026 – August 2026
Butea Tech Solutions Pvt. Ltd., Pokhara, Nepal	

- Engineered cross-platform mobile UI screens using Flutter and Dart, focusing on responsive design and seamless user experience.
- Designed interactive data visualization components and analytical dashboards for tourism dataset reporting.
- Gained hands-on exposure to data warehousing, data organization, and structured pipelines for executive decision-making.
- Applied software engineering best practices including UI design, database connectivity (DBMS), and team collaboration.

KEY PROJECTS

Fake Email Detection System Using ML & NLP	Python NLP BERT Flask
- Architected an end-to-end email classification system using Machine Learning and NLP to detect phishing/spam and legitimate emails. - Applied text preprocessing, tokenization, stemming, and TF-IDF feature extraction with unigram and bigram features. - Achieved 99% accuracy using BERT deep-learning model for text classification. - Deployed a Flask web application with real-time confidence metrics, prediction history, and an automated fallback system to Random Forest when BERT is unavailable.	

Thrifty – Second-Hand Electronics Marketplace

PHP | MySQL | JS | HTML/CSS

- Built a responsive marketplace platform for buying and selling used electronic devices with clean UI/UX navigation.
- Implemented secure user authentication, relational database architecture (MySQL), CRUD operations, and payment gateway integration.

Prayuja Enterprise Business Website

Web Development

- Designed and deployed a responsive corporate website featuring user-focused navigation, layout structures, and optimized design.

EDUCATION

Bachelor of Engineering in Software Engineering

2022 – Present

Gandaki College of Engineering and Science, Pokhara, Nepal

Higher Secondary Certificate (+2)

2019 – 2021

Motherland Higher Secondary School, Nepal

ADDITIONAL INFORMATION

Languages: Nepali (Native), English (Fluent), Hindi (Conversational), German A2

Certifications: Verified certificates accessible at subashdahal17.com.np

Interests: Artificial Intelligence, Data Analytics, Data Visualization, Data Engineering, Machine Learning
